

## **EISA Turntable 2019-2020** **MoFi UltraDeck+M**

From the same company that brought you Mobile Fidelity Sound Lab vinyl pressings, the UltraDeck+M is not just an excellent turntable, but also a complete 'plug and go' solution to play your records. It comes complete with a pre-fitted high-quality MoFi MasterTracker moving-magnet cartridge, meaning you can have it up and running in minutes, and is superbly engineered throughout for precision and quality, drawing on the expertise of some leading names in vinyl replay. That means it delivers rock-solid pitch stability, while that metal-bodied cartridge really gets 'under the skin' of the music you choose to play, emphasising the value and engineering on offer here.
